IMPORTANT!

Please remember to unroll your polycarbonate dish as soon as practical after you receive it. The longer the dish remains rolled, the longer it will take to resume it's optimal shape for recording.

Store the dish unrolled and roll it up only for brief (a week or two) periods, such as for travel or shipping.

Thank you very much for your order, I know you will enjoy using such a fine instrument as the Telinga system. If you have any questions or comments about the system, or about nature recording in general, please do not hesitate to call me or e-mail me – I want my customers to be as satisfied with their purchase as possible.

If you would like to broaden your knowledge of nature recording's techniques, theories and equipment, please consider joining the Nature Recordists' e-mail group, by visiting our web site and following the link to the Nature Recordists' e-Mail Group.

Thanks again,

Doug Von Gausig
