

# TELINGA Microphones,

Parabolic microphones & other equipment for Wildlife Sound Recording.

The PRO 5 stereo DATmic - High performance, low noise microphone for digital recording.

The Stereo DATmic has an Equivalent Noise Factor of only 14 dBA Thereby, it does great justice to the dynamic range of a modern DAT's and MD's.

The focused sound will be picked up in mono, while the background will come in stereo. Handling and wind noise suppression is excellent.

The over-all sound characteristics of the DATmic, is a "soft" high and a "big" and amazingly transparent mid and low. Without the parabola, it is a good multi-purpose stereo microphone for small-signal use.

The Stereo DATmic:
